

Greenfield Orthopaedic Centre

Post-operative Care Plan | Right Hip Replacement

Patient: Joseph Mathew

Date of birth: 02 July 1942

Room: 104

Surgery date: 17 September 2026

Allergies: Penicillin (rash)

MEDICATIONS

Apixaban 2.5 mg twice daily (08:00 and 20:00) for 30 days to prevent blood clots. Do not skip doses.

Paracetamol 500 mg, 2 tablets up to 3 times a day if needed for pain, with nurse approval.

Calcium + Vitamin D3 500 mg once daily after lunch.

MOBILITY

Use the walker at all times when walking. Do not bend the hip past 90 degrees. Do not cross the legs.

Use the raised toilet seat.

WARNING SIGNS

Tell the nurse on duty straight away about calf pain or swelling, unusual bleeding or bruising, blood in urine, or redness or discharge at the wound. He is on a blood thinner, so any fall must be reported.

PHYSIOTHERAPY

Home physiotherapy every Monday, Wednesday and Friday at 11:00 with physiotherapist Arun Kumar.

Signed: Dr. Sarah Thomas, Orthopaedic Surgeon
