

St. Mary's Hospital

Department of Internal Medicine | Discharge Summary

Patient: Lakshmi Rao

Date of birth: 14 March 1948

Room: 101

Admitted: 21 September 2026

Discharged: 23 September 2026

REASON FOR ADMISSION

Dizziness and light-headedness when standing up, with one near-fall at home. Diagnosed with orthostatic hypotension (a drop in blood pressure on standing).

HOSPITAL COURSE

Blood pressure dropped by 22 points on standing. Fluids given. No fracture or head injury. Blood sugar well controlled.

MEDICATION CHANGES

Amlodipine reduced from 10 mg to 5 mg, once daily at 08:00.

All other medications unchanged: metformin 500 mg twice daily, atorvastatin 10 mg at night.

INSTRUCTIONS FOR CARE STAFF

1. Sit on the edge of the bed for one minute before standing up.
2. Encourage 1.5 to 2 litres of fluid a day unless the doctor says otherwise.
3. Check blood pressure sitting and standing once a day and record both.
4. Tell the nurse on duty if she feels dizzy, and call 911 if she faints or falls.

FOLLOW-UP

GP review with Dr. Anita Menon on 01 October 2026.

Cardiology follow-up with Dr. Rahul Mehta on 05 October 2026.

Signed: Dr. Priya Nair, Consultant Physician
