Facility Policy | Fall Response Protocol

Policy number: CH-07

Applies to: all care staff

FIRST STEPS

1. Do not move the resident if they are hurt or cannot get up.
2. Check whether they are responsive and breathing.
3. Call the nurse on duty immediately.

CALL 911 WHEN

The resident hit their head, is on a blood thinner such as apixaban, cannot move a limb, is not fully alert, or is in severe pain.

AFTER THE FALL

Record the time and what happened. Neurological checks by the nurse for 24 hours. Complete an incident report before the end of the shift.
